# To Program Remote Control

To program the remote on the Gun 8000

1. - With the power off, press and hold the Pre-Programmed Drills button.

2. - Toggle the Power button to the On (I) position. The digital display will display LL and then start counting down from 15. After the power is on and the countdown has started, release the Pre-Programmed Drills button.

3. Press any button on the remote transmitter while the display is counting down.

Remote is ready to use.
